

Streamlining Field Operations. Delivering Excellence.

DGLIDE FSM empowers teams to plan, execute, and optimize field service operations — improving efficiency, customer satisfaction, and business growth.

Mobile First

Empower technicians on the go

Real-time Visibility

Track jobs, teams & assets in real time

Smarter Operations

Automate workflows & reduce manual work

Better Outcomes

Improve SLA, first-time fix rate & CSAT

Empowering Businesses Through Innovation

Key to Success

Innovation-Driven Solutions

01

Intuitive, customizable, and scalable solutions that enhance user experience and streamline workflows across any industry.

Efficiency Through Automation

02

Intelligent automation and AI-driven insights reduce manual efforts, accelerate service resolution, and improve field technician productivity.

Reliability and Security

03

Resilient platforms with superior security and high availability, guaranteeing data integrity and smooth operations.

Seamless Integration & Flexibility

04

SaaS solutions that effortlessly integrate with existing enterprise systems, ensuring adaptability to evolving needs.

Unified Platform. Powerful Capabilities.

Seamless Integration, Unified Operations

01

A unified platform for enterprise application integration — connecting customer, service, asset, and field operations while eliminating data silos.

Simplify Customization, Amplify Results

02

User-friendly tools for easy customization of service workflows, forms, checklists, and dashboards — no technical skills required.

Real-Time Analytics & Insights

03

Integrated analytics and reporting tools provide actionable insights for KPI monitoring and proactive decision-making.

Business Features vs. Tech Features

Business Features

5

Knowledge Management

Centralised knowledge base for faster service resolution and technician collaboration

Approval Workflow

Multi-level configurable approvals with full audit trail

Business Intelligence

Integrated BI tools for real-time, data-driven decisions

GDPR Compliant

Built-in compliance with global data privacy standards

SLA Management

Define, track and enforce service level agreements across service requests and field operations

Tech Features

5

Native AI Capabilities

AI-powered automation, smart routing and intelligent suggestions

Seamless Integration

Connect with any enterprise system effortlessly via APIs

Ready-to-use Templates

Pre-built integration connectors for rapid deployment

Configurable Portal

Fully customizable user-facing portals for any workflow

Low-Code / No-Code Builder

Build and automate workflows without writing a single line of code

Challenges FSM Addresses

Inefficient Work Order Management 01

FSM streamlines work order creation and tracking, providing real-time visibility from service request to field execution across customer sites.

Poor Scheduling & Dispatching 02

AI-driven scheduling and dispatching optimize technician allocation based on availability, location, skills, and service priority.

Lack of Inventory & Asset Visibility 03

Real-time inventory and asset tracking provide visibility into equipment, tools, spare parts, and resources required for field service.

Limited Customer Communication 04

FSM enables automated notifications, real-time updates, and centralized interaction management for customers.

Difficulty Tracking Service History 05

Maintain complete service history for customer sites, equipment, repairs, maintenance visits, and field interactions.

Empowering Businesses to Optimize Field Service

Managing work orders, scheduling, and field operations efficiently is critical to service delivery excellence.

Work Order Management

Create, assign, and track work orders with customer, site, equipment, scheduling, and technician details.

Scheduling & Dispatching

Scheduling with location and technician availability to optimize dispatch and route planning.

Inventory & Asset Management

Real-time tracking of tools, spare parts, and customer assets for better resource control and utilization.

Mobile Access

Update job status, capture service details, upload photos, and capture digital signatures directly from the field.

SLA Management

Define, track, and enforce service level agreements for consistent customer satisfaction.

Field Service Visibility

Gain real-time insights into job status, technician activity, service performance, and equipment-related service history.

Driving Efficiency, Visibility & Data-Driven Service Decisions

Job & Activity Management

Plan and monitor field jobs with real-time priorities, status tracking, technician updates, and service activities.

Manager Visibility

Track technician performance, job progress, and field activities in real time.

Workflow & Approvals

Automate field service processes with configurable workflows and multi-level approval mechanisms.

Analytics & Reporting

Access real-time dashboards and reports for actionable field service insights and KPI monitoring.

Service History Tracking

Maintain complete history of service visits, repairs, preventive maintenance, equipment, and field interactions.

Performance Tracking

Measure first-time fix rates, SLA compliance, technician productivity, and service performance using KPIs.

FSM Business Benefits

01 Increased Operational Efficiency

Automates scheduling, dispatching, and work order management, reducing manual errors and improving workforce productivity and service response.

02 Optimized Resource Utilization

Provides real-time inventory, asset, and technician visibility, ensuring better allocation of resources and minimizing service delays.

03 Enhanced Customer Experience

Improves communication with automated notifications, real-time updates, and seamless service interactions.

04 AI-Driven Automation & Insights

Smarter scheduling, preventive maintenance workflows, and AI-driven service insights enhance field service efficiency and decision-making.

05 Cost Savings & Profitability

Reduces service delays, equipment downtime, and unnecessary resource utilization, leading to lower operational costs.

06 Improved Decision-Making

Centralized service history and real-time analytics provide insights to improve decision-making at every level.

Thank You!

We look forward to turning our shared vision into reality.

Monitor work order ageing, completion status, and service performance with comprehensive real-time reports.

FSM Work Order Module

New Work Order • Work Order List Page

The screenshot displays the DGLIDE FSM Work Order Module interface. The left sidebar contains navigation options: GETTING STARTED (Analytics, Daily Planner, Resource Allocation, Meetings, Reports, Portal), MODULUS & FORMS (Metadata, Catalog, FSM), and Accounts (Workorder, Service Appointment, Schedule Maintenance, Customer Satisfaction, Browse Articles). The main area shows a 'Workorder' list with columns for Work ID, Contact, Created, Summary, Status, Priority, Type, Assignee, Agent, and Asset. The list includes 20 records, with the first few showing details for Maria Silva, James Evans, Chris Hopper, and Mike Samson. The right sidebar shows the 'Workorder' details for a specific work order, including Customer & Asset Info, Work Order Details, Scheduling & Assignment, and Location & Service.

- Preference Date 1 : dd-mm-yyyy ...

Location & Service

- Landmark : ...
- Service Location : Amanora Park Town, Hadapsar, Pune...
- Customer Address : Mondha Naka Pjyevr, Kailash Nagar, 431001, Mondha...

Create, manage and track work orders with centralized customer details, scheduling, and assignment workflows.

Work Order Activity and Tasks

Work Order Activity Details

The image displays two side-by-side screenshots of the DGLIDE Work Order Activity Details interface. Both screenshots show a work order created by Anurag Mishra, last updated 1 day ago. The left screenshot shows the 'Work Order Activity' tab, which lists activities such as 'Fan Motor Repair of Clarion Air Cooler 120L' and 'Water Leak Repair of Clarion Air Cooler 120L'. The right screenshot shows the 'Service Task' tab, which lists tasks such as 'Preventive maintenance of Clarion Air Cooler', 'Water Leak Prevention of Clarion Air Cooler', and 'Motor Fan maintenance of Air Cooler 60L'. Both screenshots show a detailed view of a work order with customer and asset information, work order details, and scheduling & assignment information.

Track work order activities, manage service tasks and checklists, capture field observations, and maintain complete visibility throughout the service lifecycle.

Mobile FSM Experience

Work Order Details • Work Order Activities • Work Order Task

Access work orders, view customer and equipment details, track activities, manage service tasks, and execute service operations seamlessly from a unified mobile workspace.

To-do , Meeting & Task Details

Task Dashboard • Schedule Meetings • Track Activities

Manage tasks, schedule meetings, and track team activities seamlessly from a unified mobile workspace.
